

Reporte de la practica 2

Mario Fernando Cárdenas Pérez

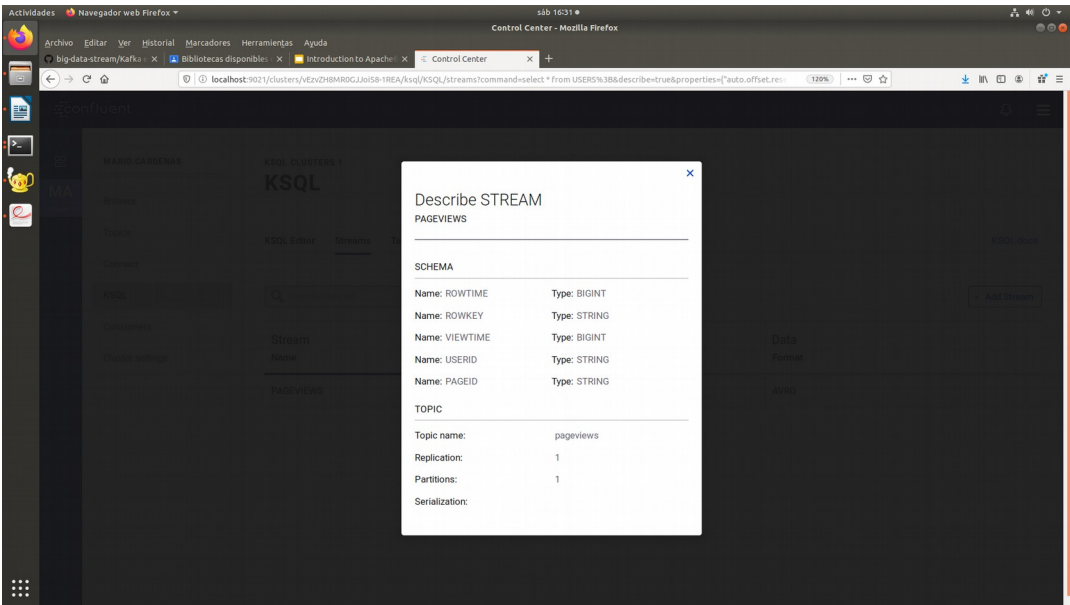

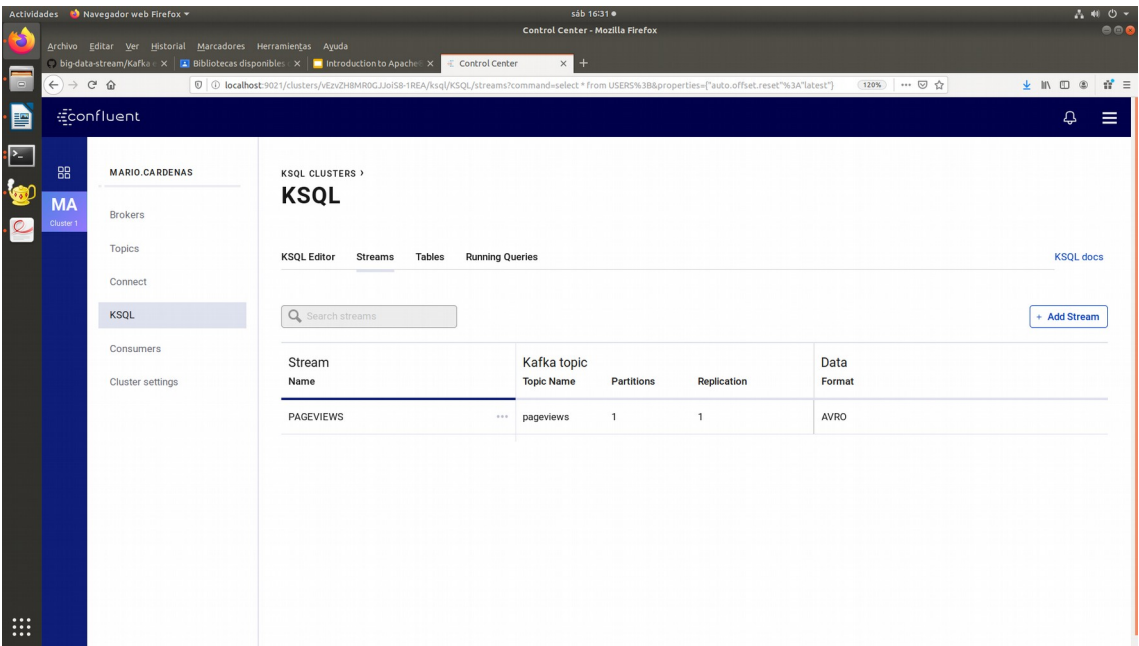

Aquí se muestran los topics que cree (users y pageviews)

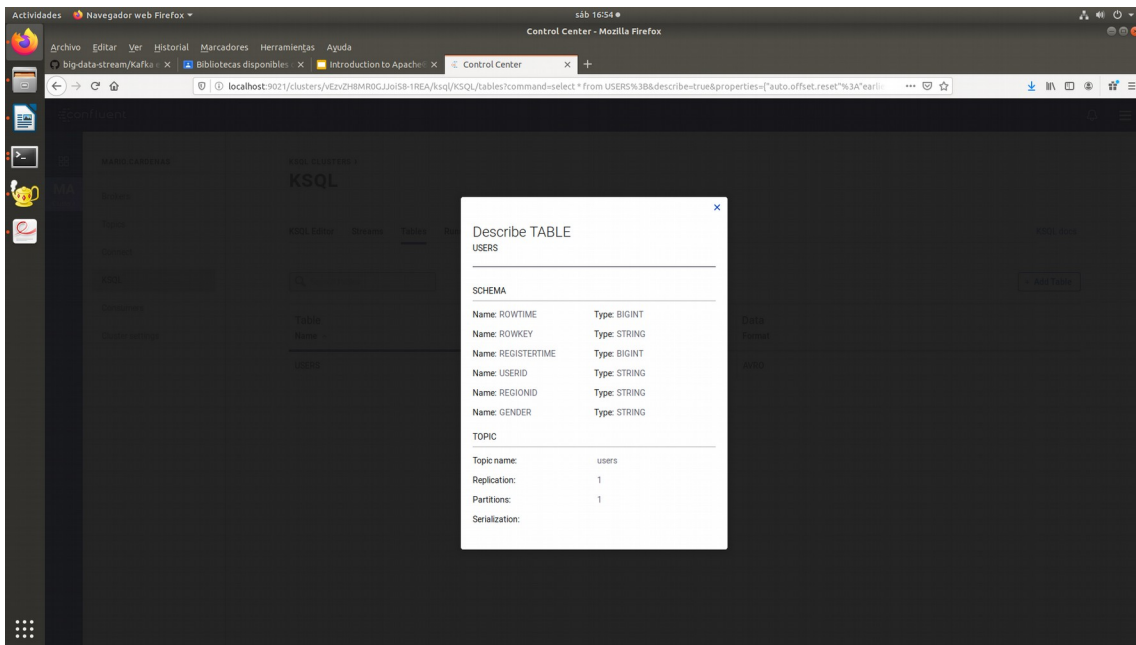

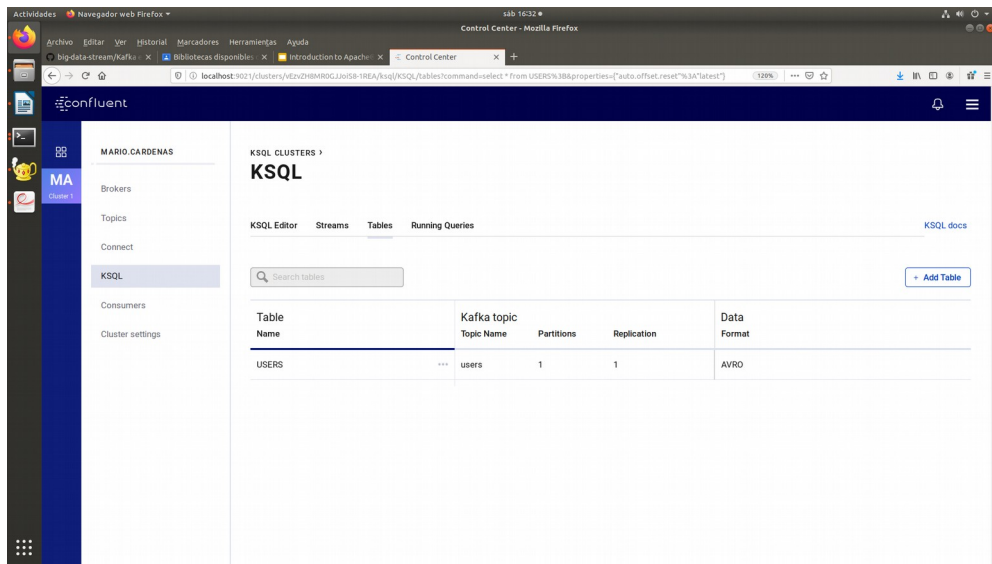

Se crearon los nuevos conectores (datagen – users, datagen - pageviews)

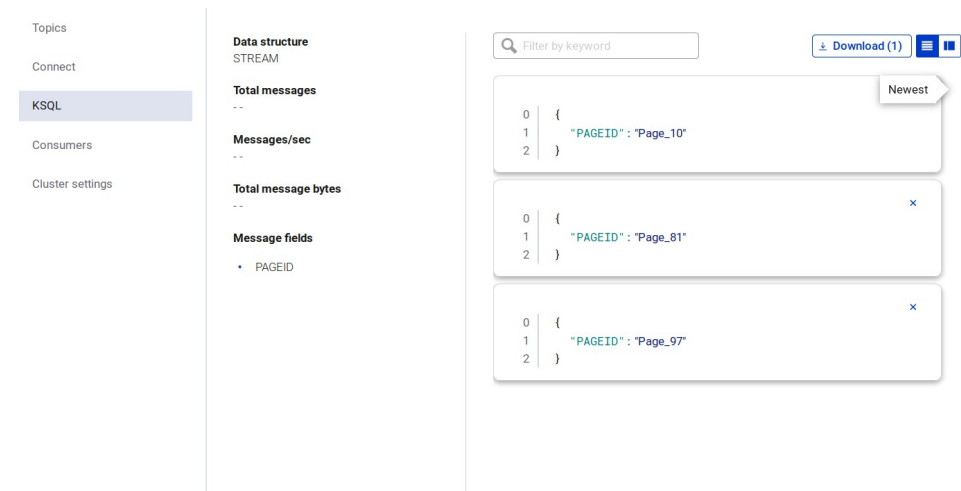

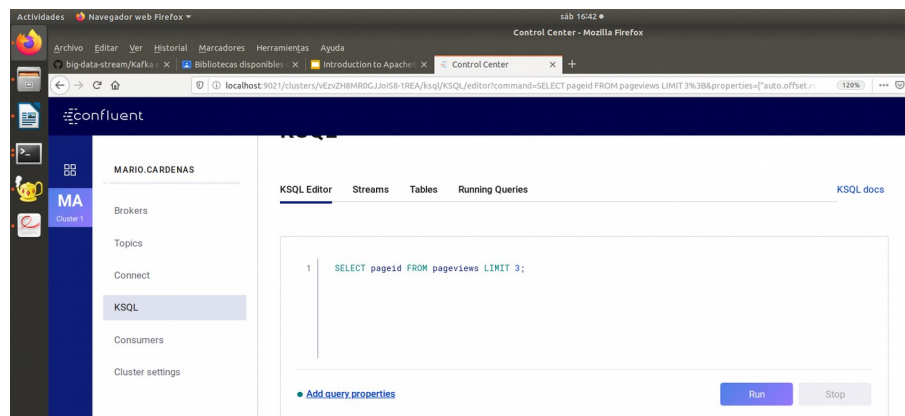

Se creo un stream en KSQL:

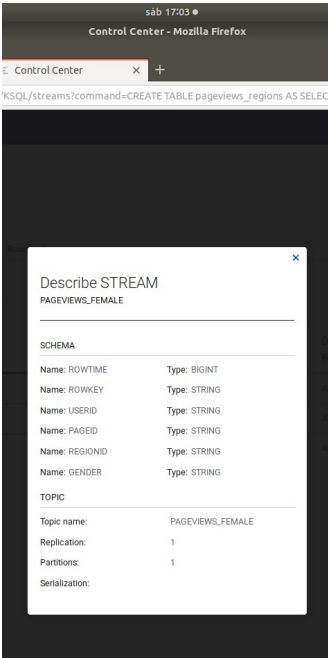

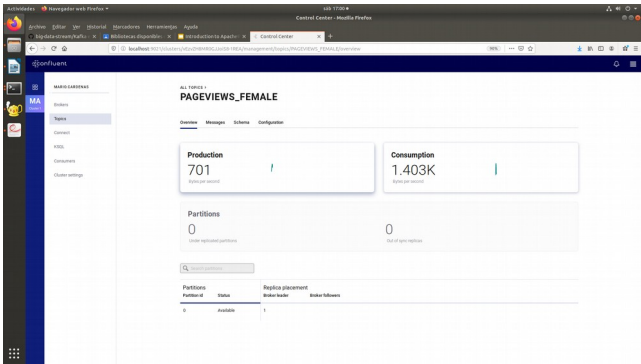

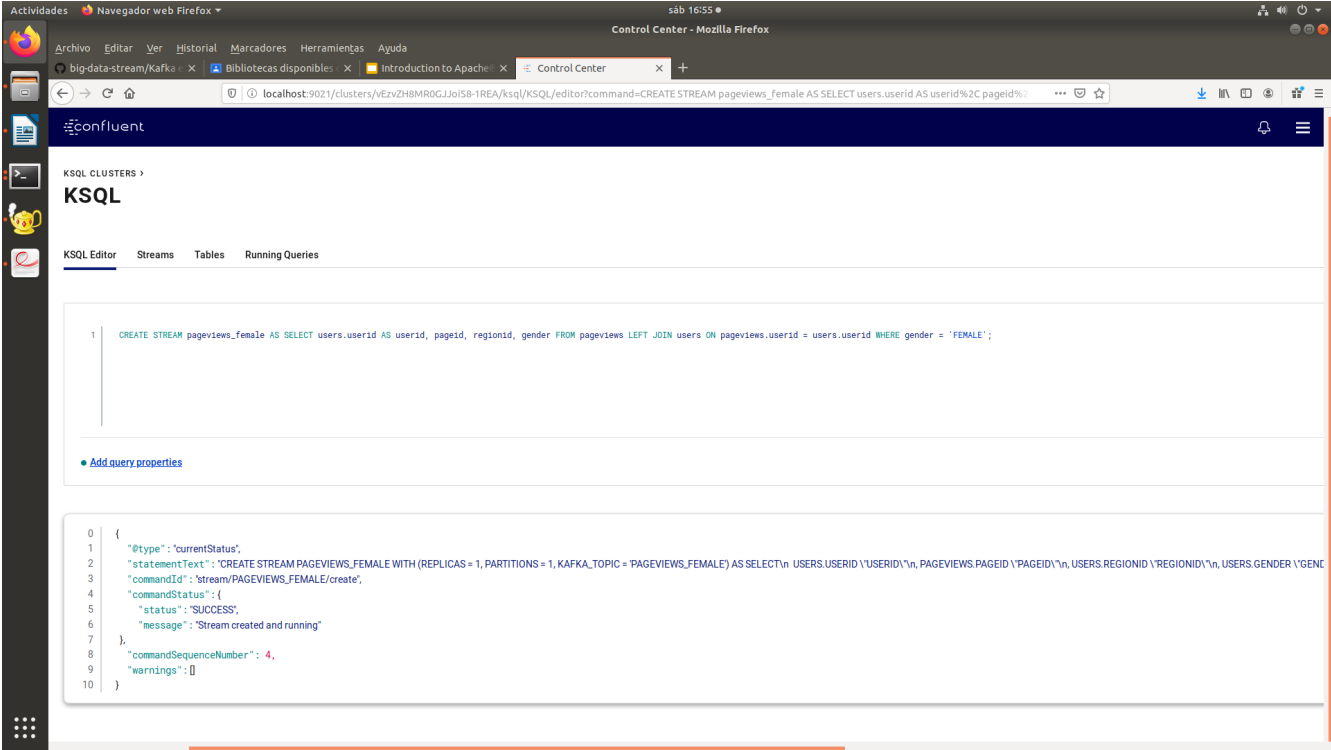

Tambien se creo la tabla users:

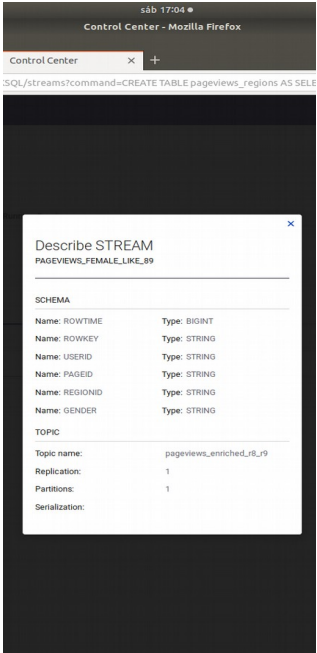

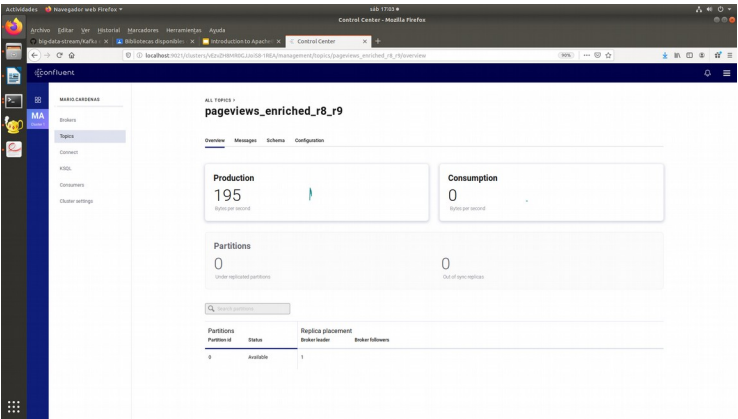

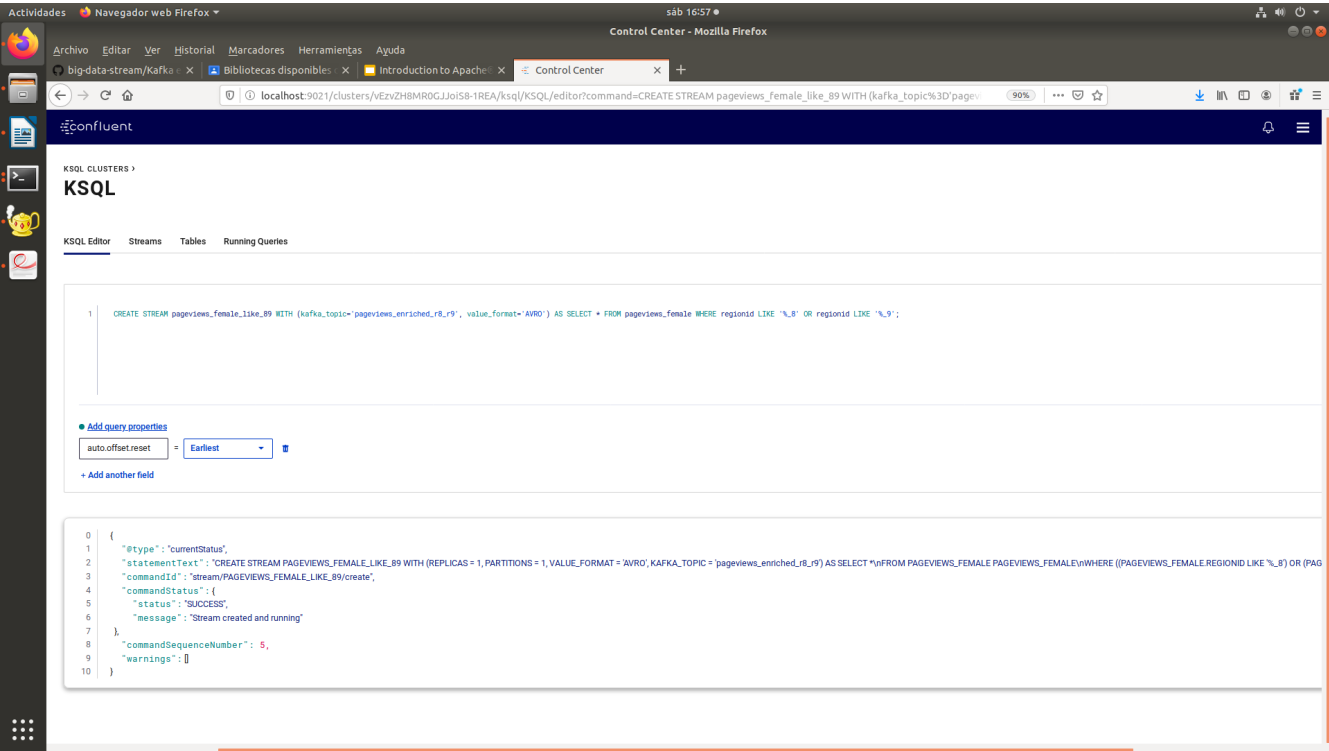

Ahora haremos varios queries en KSQL:

CREATE STREAM pageviews_female AS SELECT users.userid AS userid, pageid, regionid, gender
FROM pageviews LEFT JOIN users ON pageviews.userid = users.userid WHERE gender =
'FEMALE';

CREATE STREAM pageviews_female_like_89 WITH (kafka_topic='pageviews_enriched_r8_r9', value_format='AVRO') AS SELECT * FROM pageviews_female WHERE regionid LIKE '%_8' OR regionid LIKE '%_9';
